ABOUT US

WTS is an American company with more than 25 years of experience in the textile industry. Striving to preserve the highest quality products and well-being of all the communities and environment involved, our commitment is to create long term value for our stakeholders and generate a positive impact in our society, through transparency, sustainability, and innovation.

A woman with blonde hair, wearing a light-colored blazer over a grey top, is holding a blue garment. She is standing in an office environment with other people and computer monitors visible in the background. The lighting is soft and modern.

SUSTAINABILITY & INNOVATION

We are part of the top global alliances in sustainability management, working with low environmental and social impact products and processes, in order to offer innovative textile proposals that take care of all the communities and environment involved. Innovation is an important subject for WTS as we are constantly searching for new and better ways to make versatile, creative and efficient textile solutions.

COMMERCIAL SUPPORT & STRATEGIC ALLIANCES

With our dedicated client experts, we develop personalized solutions while having a close and constant communication. From building strategic alliances and aligning the best suppliers for our clients, to offering the most high-tech alternatives to reach top results, we support each client through all of our end-to-end transparent supply chain.

DESIGN & FABRIC DEVELOPMENT

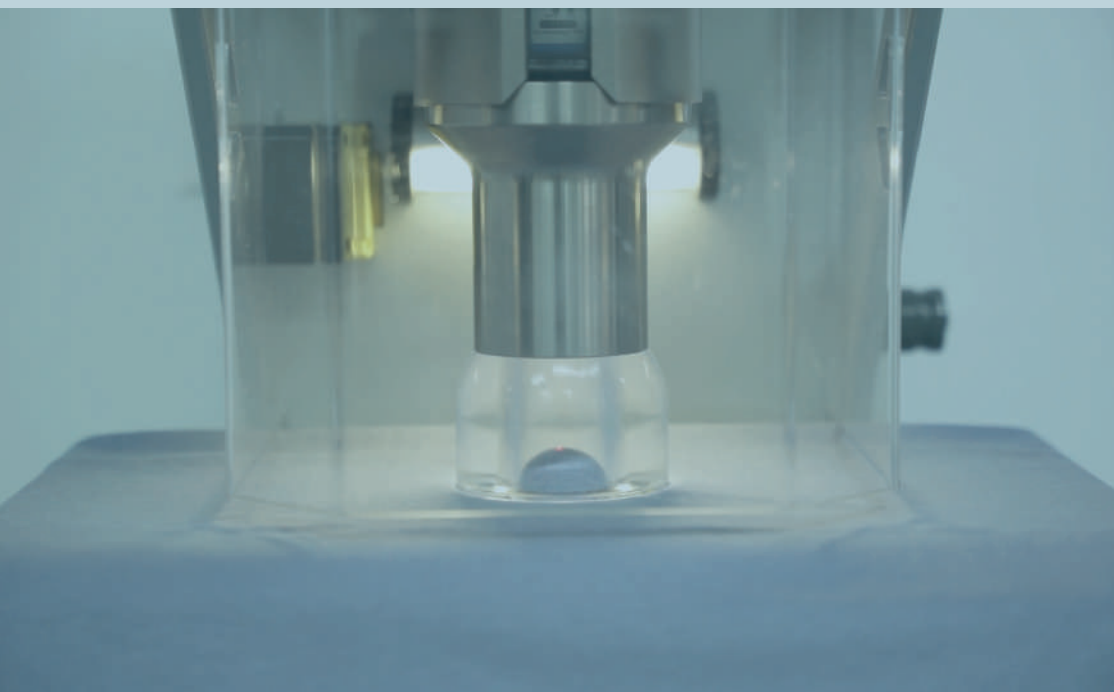

Our Design and Textile Development teams have innovation as a priority at WTS. The design and development of our fabrics is the result of an in-depth knowledge of our clients needs. We offer sustainable, innovative and functional knits according to the requirement of each client, providing unlimited blend possibilities with the finest Peruvian cotton and fibers from around the world.

IN-HOUSE BV CERTIFIED LABORATORY

Our Laboratory, accredited by Bureau Veritas, evaluates and reassures the quality of all the fabric batches of each production, from color approval to garment performance, with the highest quality standards. We work with Natic's color approval system, providing our clients centralized and integrated color management solutions to communicate efficiently. The WTS Lab team is always working to offer the best quality for our production.

DESIGN & PRODUCT DEVELOPMENT

The Design team provides all the support our clients require, making their creative process 100% assisted, with digital tools, trend analysis, market knowledge and the co-creation of their products. The Product Development team works in every technical detail of the creation process. With expertise and cutting-edge technology we provide the best technical solutions, while ensuring a smooth production.

END-TO-END TRANSPARENT SUPPLY CHAIN

The manufacturing process of the factories we work with, is the perfect balance between technology and local workmanship. With automated processes and the intervention of Peruvian hands, we offer the highest quality control standards from textile development to the final product.

NEARSHORE & WAREHOUSE CAPABILITIES

Having a warehouse and logistic structure in Miami, with a capacity over 2 million units per month, allows us to take care of the entire exportation process, making sure that all the production travel without any difficulty. Our nearshore proximity ensures a safe and reliable experience that arrives on time, as speed to market is critical to our business.

SOCIAL INITIATIVES

WTS promotes social welfare through different initiatives, as well as fair work practices. Since 2014, WTS initiated a social commitment with the community of Racchi in Cusco. The goal is to improve the quality of education through the implementation of pedagogical modules directed to 94 children between 6 and 12 years old. Alongside, we are actively working on textile projects with the Racchi community and the Infierno community in Madre De Dios to promote their economic and social development.

CAPABILITIES

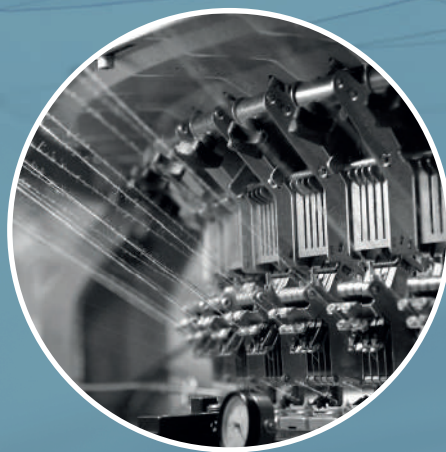

SPINNING & DYEING HIGH QUALITY FIBERS & YARNS

We have capabilities for ring spun, vortex and open end, able to spin as fine as 100/1 in Pima, with no limitation, blending different fibers and focusing on sustainable materials.

DEVELOPING & KNITTING INNOVATIVE FABRICS

With a large variety of gauges and diameters of circular knitting machines, we offer multiple fabrics: from basic Jersey and Rib, to Minijacquard and Engineered Stripes.

PRINTING, WASHING & FINISHING

Incorporating the latest technologies, we offer the most sustainable processes for garment embellishment and dye treatments, including special laundry effects, digital printing and applications.

DELIVERING FULL PACKAGE GARMENTS

We offer different garment categories for men and women such as Loungewear, Casual, Golf, Knits, Basics, Fashion, High-End, Knitted Sweaters, Performance and Athleisure.

A pair of hands is shown holding a single, fluffy white cotton flower. The hands are positioned in the center of the frame, with the fingers gently cupping the cotton. The background is a soft-focus image of cotton plants with green leaves and brown stems, some of which have other cotton flowers. The lighting is natural, suggesting an outdoor setting during the day.
